

Holiday Detector Holystar series

Sanko Holystar Series are smaller, more simplified devices for easy operation. lightweight portability and low cost. They are suitable for testing coatings of smaller objects such as small tanks, machinery, parts, etc. repaired areas and on the spot at poor staged high places, narrow spaces etc.

Specification

Model	HOLYSTAR-15	HOLYSTAR-5
Type	Low frequency, High voltage, Pulse discharge type	
Output voltage	5-15kV(Peak value)	1-5kV(Peak value)
Available thickness	0.8-5.0mm	0.1-1.0mm
Power source	Built-in Ni-Cd battery with battery check function	
Recharging Power source	AC 100V, 50/60Hz Other recharging voltages are available at extra cost. Voltage must be specified before order.	
Alarm method	Lamp & Buzzer	
Probe(Standard attachment)	PVC, with brush holder Length : ϕ 60x330mm 1kg Grounding cable 5m, Probe cord 1.5m	
Standard accessories	Flat type brush electrode(30x150mm brass) Power source recharging cord, Soft case, Attache case	
Dimensions	70(W)X120(H)X220(D)mm	
Weight	2.0kg(Without probe & accessories)
